

## Student Software Developer

I am currently pursuing my Masters in Computer Science at the IT-University of Copenhagen. During my Bachelors I was part of a dual study program combining academic studies with practical work experience in the industry. By the time I graduated in summer 2026, I gained not only a solid theoretical understanding of mathematics, computer science and software engineering topics, but also three years of hands-on experience in applying and implementing them in practice.

## Skills

### Technical Skills

- **General:**  
Java, Python, TypeScript, JavaScript, PostgreSQL
- **Frameworks & Libraries:**  
Spring Boot, Vue.js

### Core Competencies

- Problem-Solving & Analytical Thinking
- Team Communication, Self-Responsibility & Ownership

## Work Experience

### Software Developer

BarmeniaGothaer | September 2023 – August 2026

- Work as Software Developer as part of Dual academic program during studies
- Gained extensive experience through work in different Teams, technologies and various projects
- Besides typical programming tasks I also learned to deploy and manage production applications with Jenkins and container-platforms like Kubernetes

Important Projects beyond day-to-day task:

- Took responsibility for a production-used student application. Maintained and enhanced the application and gained experience in full system ownership.
- Built a centralized SMS sending service with API access to standardizing SMS sending across multiple applications; focused on scalable and maintainable architecture
- Analyzed opportunities and challenges of using AI in marketing automation and developed a system to optimize newsletter delivery, using Reinforcement Learning, in order to achieve higher opening rates, click rates and an improved lead generation

# Education

## **M.Sc. in Computer Science at ITU**

Copenhagen, Denmark since August 2026

## **Bachelor of Science (B.Sc.) in Applied Mathematics and Computer Science (Dual Study Program)**

Sep 2023 – Aug 2026

- FH Aachen / University of Applied Sciences - **Overall grade: 1.5 (German grading)**
- Dual academic program combining university studies and industry training
- Focus areas: software development, algorithms and data structures, applied mathematics
- Studies also result in additional Vocational qualification (IHK):  
Mathematical-Technical Software Developer (MATSE)
- Practical experience through continuous work at partner company
- Partner Company: BarmeniaGothaer

## **Higher Education Entrance Qualification**

2016 - 2023

- Albertus Magnus Gymnasium, Cologne, Germany
- Overall grade: 1.3 (German grading)
